Redux

PROFESSIONAL EXPERIENCE

Laabamone Business Solution

June 2024 - Present

Project - Facepos (Payment Transaction)

Designed and developed Facepos, a secure, intelligent payment transaction application integrating facial recognition for authentication and QR-based peer-to-peer payments. The platform streamlines digital payments through advanced user-role management and seamless user experiences for Customers, Merchants, and Admins.

Key Features:

- Face Login: Facial detection-based secure login for quick access.
- CTC Payment: Customer-to-customer transactions using internal wallet system.
- QR Payment: Scan-and-pay and QR generator for receiving payments.
- Pay & Request: Users can send or request money via mobile number or QR.

Project - 5AAB (porter App)

- 5aab is a mobile application developed using React Native that connects users with professional porters for on-demand assistance in transporting goods. Whether it's moving furniture, delivering packages, or assisting with heavy lifting, the app provides a seamless experience for users to book a porter for various tasks.

Project - Apurva Merchant / Customer

- Developed a points-based loyalty and reward system for merchants and customers using React Native. Enabled customers to buy points, share points with merchants, and receive points in return as part of loyalty programs or special offers. Integrated Razorpay for secure payment processing, allowing smooth transactions for buying and transferring points.

Aalavai Technologies

June 2022 - July 2023

Project - OFAOS

- Ofaos was mobile application which was available in App store for IOS users and in Play store for android users. This application served as a Database of resume,jobs and recruitment consultants.It was platform were job seekers and hiring managers meet. Users can upload their resumes and submit them to employers and recruiters for review, while employers and recruiters can post job ads and search for potential employees
